Re: Monthly Report for August, 2009

We recorded 0.8 inches of rainfall in August as compared to 2.1 inches of rainfall in August, 2008. We used 1,022.3 million gallons (mg) of water for the month compared to 1,129.6 mg last August, which is 107.3 mg less than last year.

Our average usage this August was 33.0 million gallons per day (mgd) or about 317.5 gallons per person per day (gpcd). For August of 2008, we averaged 36.4 mgd for about 363.4 gpcd. Our daily water usage ranged from a minimum of 21.1 mgd on August 21 to a maximum of 41.1 mgd on August 20.

Also during the month of August, we performed 191 free irrigation check-ups for residents, including 56 requested for violations and 15 for new smart controller registrations. Since we began our free irrigation check-up program, we have completed over 3,200 check-ups. With only limited monitoring, we recorded 602 violations throughout the city in August. We also performed 90 checks for leaks requested by residents.
